- **12.6 Endocrine disrupting properties**  
The product does not contain substances with endocrine disrupting properties.
- **12.7 Other adverse effects**
- **Additional ecological information:**
- **General notes:**  
Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water  
Do not allow product to reach ground water, water course or sewage system.  
Must not reach sewage water or drainage ditch undiluted or unneutralised.  
Danger to drinking water if even small quantities leak into the ground.  
Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

### SECTION 13: Disposal considerations

- **13.1 Waste treatment methods**  
Disposal of lime products must be carried out in accordance with legal provisions:
  - 1.Product - unused residue:  
If possible, re-use the product (shelf life and storage method are important). In the event of disposal, harden it with sand and dispose of it according to "product - hardened" or deliver it at separate collection of hazardous construction waste, classification number: 17 09 03\* (Other construction and demolition wastes (including mixed wastes) containing hazardous substances)
  - 2.Product – hardened  
Prevent entry into drains. Remove hardened material as construction waste. The waste is not hazardous waste, but is inert. Classification number of waste: 17 09 04 (Mixed construction and demolition wastes).  
Packaging waste  
Packaging waste must be completely emptied and disposed of in accordance with the Decree on packaging and packaging waste handling, classification number: 15 01 02 – Plastic packaging.
- **Recommendation**  
Must not be disposed together with household garbage. Do not allow product to reach sewage system.  
Hand over to hazardous waste disposers.
