TECHNICAL SHEET 21.03.01-EN

EPS 100

1. Product description

Thermal insulation boards made of expanded polystyrene.

2. Technical data

Board dimension: 1000 x 500 mm
Thickness: 10 mm to 300 mm

3. Resistance

Temperature resistance: 70°C on a long-term basis.

4. Standard

EN 13163:2012+A1:2015

5. Quality

The quality characteristics of the product are determined by European standards. Achieving the declared or prescribed level of quality is ensured by the ISO 9001 quality control system, which includes daily product quality checks in our own laboratories. In manufacturing process, we strictly comply with European standards in the field of energy saving, environmental protection and ensuring safety and health at work, which is confirmed by ISO 50001, ISO 14001 and ISO 45001 certificates.

6. Field of use

- for thermal insulation of flat and slanted roofs;
- for thermal insulation of floors with normal load;

7. Application

Depending on the purpose of use, thermal insulation boards are installed by gluing, mechanical fastening or they are laid freely.

8. Packaging

Thermal insulation boards are in a package of 0.25 m3, wrapped in an opaque PE-foil. Each package contains a declaration sheet in accordance with the SIST EN 13172 standard.

9. Storage

Store in covered areas, away from sources of heat and flame, do not expose to UV rays, avoid contact with incompatible materials/chemicals.

10. Waste management

The manufacturer guarantees that all its packaging is included in the waste packaging management system (Ur.l.RS, No. 54/21 with all amendments and additions).

11. Technical specifications - 1

CE- technical code EPS-EN 13163-L3-W3-T2-S5-P10-DS(N)5-BS150-CS(10)100
